RESUMERADAR · FREE ATS CHECKLIST

The ATS resume checklist.

Twelve checks to run before you hit submit. If a box cannot be ticked honestly, fix it or leave the claim out.

01 Make it readable

- ☐ One column, no tables or text boxes for key content.
- ☐ Standard headings: Summary, Skills, Experience, Education.
- ☐ Real selectable text, not a screenshot or image of a resume.
- ☐ Dates as month and year, with an end date for every role.

02 Put contact details in plain text

- ☐ Name, email, phone, city, and LinkedIn at the top.
- ☐ No contact details trapped in a header, footer, or graphic.
- ☐ Use a professional email address you check daily.

03 Match the posting's language

- ☐ Extract the top 8–12 must-have terms from the posting.
- ☐ Mirror exact tool, platform, and certification names where true.
- ☐ Use the employer's vocabulary, not synonyms, for must-haves.
- ☐ No white text, hidden keywords, or skills you cannot defend.

04 Show evidence, not duties

- ☐ Each bullet: action + scope + measurable result.
- ☐ Replace "responsible for" with what actually changed.
- ☐ Add honest numbers: team size, volume, budget, time saved.
- ☐ Three to five bullets for each recent, relevant role.

05 Fix the top third

- ☐ Summary: target role + years/scope + two skills + one result.
- ☐ Core skills ordered for this posting, not alphabetically.
- ☐ Most relevant role and bullets first on the page.
- ☐ No photo, objective statement, or skill bars.

06 Test before you apply

- ☐ Copy the PDF text into a plain editor. Does it still read?
- ☐ Scan against the same posting and fix structure warnings first.
- ☐ Re-scan. Stop when the gaps are things you cannot claim.
- ☐ Apply while the posting is fresh, not two weeks later.
